Grant for anti-malaria measures for 1942-43

File No of 1941 — General and Revenue Secretariat

Serial No

anti-malaria measures of a permanent nature in ~~the~~ Bassein, Belur, Mudgere, Koppa & Sakrepatna at an estimated cost of Rs 42,761

The detailed plans & estimates for all the works except in the case of Belur have been also received

The including this amount, a provision of Rs three lakhs was proposed in the State Budget for 42-43 but only a sum of Rs 1,25,000 appears to have been provided for in the Supplt Budget Estimate of the State for 1942-43 now under consideration

These are measures for which provision is being asked for a long time Its necessary to undertake these works which are of a permanent nature and intended to eradicate malaria in these places. Having regard to the demands on the provision of Rs 1,25,000 made in the Budget for 1942-43, it would not be possible to spare any amount of it for the above anti-malaria measures.

Grant for anti-malaria measures in the State for 1942-43

6797/2

General and Revenue Secretariat — Jul File No — of 1941 — W — [App F III-2

Serial No 2

2) It is therefore submitted that a provision of Rs 40,000/- may be made in the State Budget for 1942-43 under a separate ~~head~~ sub head under 30 - Grant for Public Improvements ~~under~~ styled as the "Anti-malaria measures" to be operated upon by the Director of Public Health. Such an arrangement would facilitate the funds being drawn intact by the Dept of H and would also avoid unnecessary delay / correspondence in this matter

To, The Director of Public Health
L4693 dt 11/11/42
Calls for the plan & estimate for undertaking the engineering measures to Control malaria at Belur

3) The file is resubmitted for orders with reference to para 35 of the rules

11/11 These papers relate to the grants asked for by the Director of Public Health for carrying out anti-malarial measures of a permanent nature in some village Panchayats & some Municipalities in the State. The estimates & plans have been prepared in regard to all these works.

Sanction is a village Panchayat The estimate for carrying out the engineering works for the prevention of malaria comes up for Rs 50,444/- As it is a village Panchayat, the required funds will have to be found out of the Rural Reconstruction grant during the current year. The amount is however large for one village Panchayat. The Revenue will be requested to furnish his opinion if at least half the above amount could be made available this year. This is for orders A

2) In regard to the four maths, further information has been called for from the Director of Public Health about the works to be taken up at Belur. Receipt of information will be awaited B

~~Anti-mosquito funds~~

(1) The estimates in respect of the three Mtks of Hoogjan Kuppa & Pandyan amount to Rs 10,000/-, Rs 14,000 & Rs 4,500/- respectively. If considered absolutely necessary, the following grant may be given during the current year, the balance being provided for next year.

(1) Hoogjan Rs 5000/-
(2) Kuppa Rs 4200/- } or Rs 13,720 only
(3) Pandyan Rs 4520 } Temporary grants.

(2) Of late, anti-malaria operations are being taken up on a large number of places by Mtks & Village Panchayats in the State this also becoming a regular feature of work of the Public Health Dept. Some Mtks like Dodabetta and Baranam (Anaikatti Taluk) have asked for anti-malaria measures being taken up at the cost of Govt in order that the works taken up already may be continued so as to yield tangible results, it seems quite necessary to place a certain amount every year at the disposal of the P H dept. So that the Dr of P H may operate on that funds, without reference to Govt for funds every time an application is made by a Mtk & without break in the work already taken up. Having regard to the demand on the Town Improvement funds, it will not be possible to divert the funds for such temporary purposes, like the grants are intended

Matters considered and instructions given at the meeting of the Dewan and the Second Member of Council with the Director of Public Health, on the 4th April 1941 in the Dewan's Chambers.

I. Subjects of the Director of Public Health -

1(a) Re. appointment of Health Probationers. The Second Member has ordered on the file that further proposals in the matter may be awaited from the Director of Public Health. The proposals have been received from the Director just to-day (4th). This will be worked up and submitted for orders.

(b) Re. posting of the 4 trained Health Probationers.- It has been ordered by the Member on the file that the Director may be asked to send proposals, through the Comptroller, taking into account any sanctioned places not yet filled up. The Director has been written to, accordingly.

2. Mandya Malaria Control Work - (Joint Committee Report). The proposals that have been made are for the control of malar in 15 villages in the Mandya Taluk and are in two parts. One relates to miscellaneous measures, like grading and canalising valleys, excavating in marshes, subsoil drains, breaching pon filling up pits, etc. The other relates to creating a dry belt round each village and breaching tanks.

The Second part involves difficulties of various kind and would require further detailed examination before orders could be passed. The first part could be taken up and sanc tioned immediately. The cost of the works included in this first part is estimated to come in the first instance to Rs.30,000. The work may have to be followed up, estimates fo further ork being obtained later on The amount will have be found from the Krishnarajasagara Works

Orders in this matter would now issue from the P W D (I R S) The Second Member has seen the file and has order that the file may be submitted to the First Member and the Dewan. The file is marked to the First Member and the Dewan through the Financial Secretary and is now with the Financia Secretary.

The position of the matter was explained during the

during the meeting. The Dewan suggested that health propaganda by the Department may be carried on in this area in this respect and that the Director may explain to the people the need for these measures and advise them, and that the services of Mr Seetharama Sastri may also be availed of for the purpose of doing propaganda work relating to the malaria control, cotton cultivation, etc , in the Mandya District.

3. Re. deputation of two Health Probationers for the D.P.H. course at Calcutta for 1941-42 The file is under submission to Second Member with the views of the Financial Secretary. The Second Member to whom the file was since submitted has caled for particulars as to when these probationers were recruited.

4(a) Question of additional grant under Town Improvement grants for anti-malaria works.- The case has been examined The Director requested first that a sum of Rs.50,000/- may ~~may~~ be set apart yearly for anti-malaria engineering works. After examination and correspondence the Director has been informed in this office letter No G.3823 dated 21st March 1941 that "it is not possible to allot additional grants under Town Improvement Grants and anti-malaria works and that all new works have to be deferred till next year unless they are quite urgent and cannot wait for a few months more, and that in the latter case, all possible attempts have to be made to meet these funds by re-appropriation by postponing less urgent works already provided for and not yet taken up".

(b) Request of the Director for grants required for malari engineering works in Hiriyur, Belur, Madigere, Sakrapatna and Koppa for 1941-42 This reference has been received recently from the Director and is being worked up. The Director explained at the meeting the position and the need for the proposed grant in regard to each of the items. The Dewan instructed that the case may be worked up very early and that particularly in regard to Hiriyur, the work that has been taken up may be completed with the help of some Town Improvement Grants In this connection the Director of Public Health suggested at the meeting that the amount of Rs 8,500 that has

that has been provided in the current years budget for the prevention of malaria and that could not be utilised this year might be taken over as Town Improvement Grant and given to Hiriyur town for carrying out one section of the cement concrete channel to be constructed in the Hiriyur river bed. It was observed that this proposed re-appropriation might be agreed to and that the Director might submit proposals to Government and take orders.

The Member observed also that the amount that is not likely to be spent out of the grant of Rs.9,014 for Periyapatna Health Centre might well be utilised for effecting some town improvements for Periyapatna Taluk. The Director said that proposals had already been sent to Government in this respect. A sum of Rs.6,200 that is not likely to be spent this year might be surrendered for this purpose of town improvement in the Periyapatna Taluk during this year. (The case is being worked up and will be submitted for orders)

Other matters and instructions.-

1. The Dewan observed that there was some foul smell near the Aircraft Factory. The Director explained that it was due to sewage from Cantonment passing over Domlur to Challaghatta Tank, and that this Challaghatta tank has also been a breeding-ground for mosquitoes. The Dewan instructed that the Director might write to the authorities concerned about this matter and see to it specially

2. The Dewan observed that the sewage main along the Kumbaragundi road (Lalbagh Side, Bangalore City) should not be allowed to be tapped and that there should be no bad smell. The Director said that a scoring plan for the next year had already been sent to Government in connection with the sewage system in the Bangalore City, one of the items therein being for the extension of the main from its present position

3. Kolar Town Water-Supply Improvement - Both the Member and the Dewan observed that no action had as yet been taken by Mr. K.S. Hutchu Rao, Sanitary Engineer, in spite of instruction, and there was much delay in regard to this matter. The Dewan remarked that this was very bad, and he ordered

that the Director should tell Mr. Hutchu Rao that he (Mr. Hutchu Rao) has given room for delay and complaints and is falling in our estimation and that serious consequences would ensue if he does not show improvement The Director may communicate this to Mr. Hutchu Rao in person, and also in writing.

Place	Previous year's grant	Grant now required	Office notes

To

The Director of Public Health in Mysore,

Bangalore

Sir,

I am directed to request you to forward consolidated proposals re the estimated amounts that may be required in respect of the schemes for controlling malaria in the different towns of each District for the current year out of Town Improvement grant for 41-42 Separate proposals may also be submitted to Government re the grants required for each town for the above purpose before the 5th September 1941

I have the honour to be,
Sir,
Your most obedient servant,

V Arunachalam

For Secretary to Government,
Law Department

bnl 2

A Note on the Engineering Works for Malaria Control in Hiriyur, Belur, Mudigere and Koppa and Sakrepatna

Hiriyur - The amountof the comprehensive scheme for this work is Rs 60,570/-, the first ard second stages of the work amounting respectively to Rs 3,700/- and Rs 7,000/- have been executed so far and the outlay booked is about Rs 8,500/-

The comprehensive scheme consists of the following major heads

(i) Hallas and ponds
(ii) Installation of flushing gates in the channels
(iii) Canalising the river

(i) Under hallas and ponds, so far as the progress secured uptodate is concerned, a sub-soil jelly drain to a length of 2,700 r ft has been constructed and clay pipes have been laid over a length of 3,925 ft In addition to this an open drain with the bottom and sides rivetted has been constructed to a length of 1,520 ft and the excavation of a furtner length of 5,000 ft is completed to put in necessary pipes Two automatic syphons of Devillier's type have been installed in Cheeta and Mallerhalla valleys

(ii) A flushing gate for installation on the right bank channel has been manufactured at the Central Industrial Workshop Bangalore, along with necessary gear arrangement and the masonry works connected with the installation of the same have been entrusted to the Executive Engineer, Chitaldrug Division

(iii) An earthen channel with an average depth of 3 ft and about 12 ft wide has been opened in the bed of the river in order to confine the flow into the same This is an incomplete work and the channel has to be deepened and widened besides providing a lining of impervious material so as to prevent pockets being formed,

In addition to these, certain minor works such as jungle clearing, clearing of vegetation in the marshy areas, putting up slabs across channel crossings have been done in order to prevent the stagnation of water

Regarding the further amounts required, a sum of Rs 10,000/- may be provided for further works connected with canalising the river bed and for the erection of the automatic syphons across the channels It is, however, noticed that the rates provided for these items of work require revision, so that until the estimate is revised, it is not possible to undertake the respective items of work.

B e l u r - An estimate amounting to Rs 4,750/- has been sanctioned in Government Order No L 5659-61/Ml 48-38-198 dated 19th December 1939 for engineering works to control malaria at Belur and the outlay incurred upon the same so far is Rs 4,676-8-0

The sanctioned estimate provided for grading the bed of the fort moat at Belur with necessary construction of culverts so as to drain off all the water without giving room for stagnation, and at the same time it provided for filling up the scours in the waste weir valley of Kalsinkere Tank, so as to prevent the breeding of mosquitoes there.

Both these items of work have been completed but it is noticed that there are a few points in the fort moat where stagnation is still taking place and it is necessary to close the up in order to derive the best results from the works executed so far This is estimated to cost Rs 1,200/-

In addition to these, there is another spot where mosquitoes breed at Belur, viz , the waste weir valley of Vishnusamudra Tank Detailed estimates for this work are not yet prepared A sum of Rs 5,000/- may be provided for this during the current year

Mudigere - No works have been started at Mudigere The construction of automatic syphons across the Sundekere Halla at Mudigere was the one work estimated at Rs 4,520/- Tenders for this work were called for during 1939-40, and since the cost was much higher than the amount of the estimate the works were not undertaken The full amount may be provided during the current year

K o p p a - The anti-malaria works are estimated to cost Rs 14,000/-, but no amount has so far been sanctioned and no works have been undertaken A sum of Rs 14,000 may be provided during the current year

Sakrepatna The amount of the comprehensive scheme for this work is Rs 9,306/- This includes Rs 6,250/- being the cost of estimate submitted by this office and Rs 3,056/- being the cost of acquisition of wet lands as per Bureau of Epidemiology Superintendent's recommendations for including the same to the estimate prepared by this office for executing the permanent works suggested.

During the year 1938-39, the work of clearing the rank vegetation in the moat was carried out, which has amounted to Rs 1,265 as per booked outlay

The comprehensive scheme consists of the following major heads -

1	Earth work filling for deep scours to regrade the bed of the moat	Rs 3,804/-
2	Constructing a retaining wall with rough stone in mortar, for protecting the earth from scouring action at the existing opening leading to Vedavati River	Rs 96/-
3	Thick jungle clearing in the bed of moat with roots	Rs 800/-
4	Providing side revetment for the irrigation channels with in a half mile zone of the peripherry of the village	Rs XX,XXX/- 1,320/-
5	Acquisition of wet lands (as per subsequent recommendations of the Superintendent, Bureau of Epidemiology)	Rs 3,056/-
	Contingencies	Rs 230/-

The amount of comprehensive scheme is Rs 9,306/- For jungle clearing an amount of Rs 1,265/- has already been spent The balance of Rs 8,041/- may be provided for the remaining items of the scheme

Thus the total amount required for the antimalaria works during the current year is Rs 42,761/- as follows -

Hiriyur	Rs 10,000	
Belur	6,200	Total
Mudigere	4,520	Rs 42,761/-
Koppa	14,000	
Sakrepatna	8,041

Bangalore (S India) dated June 7, 1943

From

The Director of Public Health
in Mysore, Bangalore

To

The Secretary to Government,
Law Department, Bangalore

Sir,

With reference to your letter No G 10952/P H dated 16th March 1943 forwarding the petition from the public of Hiriyur taluk and the members of the Municipal Council, Hiriyur town regarding anti malaria engineering works in Hiriyur town and in continuation of this office letter No.BM 2550 dated 27-5-1943, I have the honour to state that the statement that an estimate for Rs 67,500/- for anti malaria works has been sanctioned, is not correct The estimate has been submitted to Government and sanction is awaited However part estimates as noted below for first and second stages of the work have been sanctioned and expenditure also booked as noted

	Amount of estimate	Expenditure booked
1. Malaria Control work in Hiriyur (First Stage)	7,000/-	8,252/-
2 -do- Second Stage	3,700/-	4,540/-
3 Construction of a masonry sluice for flushing the channel at Hiriyur	2,922/-	not yet sanctioned

The Sanitary Engineer and the Superintendent, Bureau of Malariology are both jointly inspecting Hiriyur town and preparing an up-to-date estimate for present requirements to tackle the problem. The fresh estimate, as soon as it is ready, will be submitted to Government for sanction

I have the honour to be,
Sir,
Your most obedient servant,

P. Parthasarathy

Director of Public Health

light of the rates prevailing at present
In regard to Sakrepatna, a comprehensive
scheme has been prepared But as the
Minister L.S.G. has been pleased to state
in connection with the petition of the
residents of this village about the fitting
up of the Bunds at the place that he
would inspect it before passing orders,
perhaps the works now already undertaken
& those to be executed hereafter may be shown
to the Minister & then the question of
taking up further works here may be
decided in the light of the instructions which
the Minister may be pleased to give
If further there is no money available
to the extent of Rs 42,764 for these works &
an addl grant will have to be asked
under Zamindaree Improvement (Minor a reserve
of about Rs 15,000/- under this head now)
Having regard to all the facts stated
above, it is for orders of the Govt if it
may not be requested to send up well considered A
detailed scheme & estimates for each Zamindaree
before the end of June 42 so that the required
provn may be made therefor in the State Budget
for 42-43
